On the other hand, our belief on the fact that the change and growth that our country has been passing through will increasingly continue in the future years, establishing progressive targets into primary priority, made us initiate Tema Istanbul project works excitedly. Firstly we turned our excitement into a dream, then, the dream into an opinion, finally, our opinion into an investment in accordance with the interests of Turkey.

We, as well-established companies, dedicating our years to this sector and having our names signed under many successful businesses, have come together and decided on a multi-functional and huge project that shall add value to Istanbul with a totally new life and entertainment culture. We have named this project, in which we have planned together with themed entertainment parks, housings, shopping opportunities, socializing areas, as Tema Istanbul, and we have delivered 3531 housings, composing the first stage of the project, rapidly and fully in 24 months.
